

# RAVEN REPORT

September 2014

## Raven AGM

The AGM is done and dusted for another year, thanks to those of you who were able to make it to the meeting. Our board of directors has been chosen so thank you to those who have decided to be on the board and thanks for your past help to those who have decided to stand down.

People Behind Raven

We've had our usual end of summer staff changes in the depot. Some of our depot workers have gone back to school. So, come in sometime and say hello to the new faces.

## Worm Donations

You might know that Raven gives out composting worms, if you didn't you do now. We are low on worms at the moment. We had a donation recently but if you're interested in vermicomposting and have some extra worms we'd be happy to accept them and build up our crew of worms. (Yes, there is a collective noun for worms)

## RECYCLING CLUB NEWS

Remembering numbers is hard, isn't it. Except for 42 of course, who could forget the answer to Life, the Universe and Everything? Remembering your recycling club number can be tricky. So, here's a suggestion that came through the depot. Stick a piece of masking tape on your recycling bin and write your membership number on it. No need to struggle with remembering it anymore!

*"It is said: Everywhere is in walking distance...if you have the time."*

"The summer sun is fading as the year grows old..."

Yes, tis the season of mists and mellow fruitfulness as Keats wrote. Not that he ever lived in the Yukon though.

As we are now done with summer, someone had to say it, Raven is operating on non-summer hours and so we're closed on Sundays. But to help make up for that we now accept scrap metal on Mondays! September is a great time to do a sweep around the yard and the shed to check for recyclables and scrap metals. You know, pick them up before they freeze to the ground.

## DID YOU KNOW?

Raven accepts rechargeable batteries of all kinds for recycling. They can go in the box in the depot. Lead-acid batteries go to scrap metal in the yard and we pay 10 cents a pound for them. We can't accept non-rechargeable alkaline batteries. If you're in Whitehorse then the city's official position is that they go in the garbage. Outside of Whitehorse please check with your local community.
